## *Speed Of Dry, Finishes Like Wet. Tolex, The Perfect System For Your Topcoat Sanding.*

Tolex, a breakthrough in both micro-finishing sanding and dry lubrication process technology, results in a system that allows true topcoat sanding without the use of water. Dust and nibs can now be located and removed quickly thanks to the blocking effect of the Tolex pads. Tolex scratches are extremely uniform and shallow, they can be easily removed by light compounding or with the Buflex system. If you are concerned with the productivity of your topcoat finishing but prefer not to wet sand, Tolex finishes are the closest to wet but with the speed of dry sanding.

 **EAGLE**  
ABRASIVES

Achieving quality through consistency.  
Manufactured by Kovax Corporation, Japan

# Tolex The Best Finish In Dry Sanding.

Utilizing the most uniform abrasive minerals available and state of the art **Roller Coating** technology, **Tolex** system achieves finishes more evenly and shallower than any other dry sanding system ever had before. Its highly effective dry lubrication process allows minimum clogging, thus increasing sanding life and productivity.

Topcoat sanding will be faster and more efficient as small paint runs and dust nibs are easily identified and located in the first pass of light sanding with Tolex. These imperfections are then quickly and effectively removed by continued sanding on needed areas only. Therefore, oversanding as well as overlooked dust nibs can be easily avoided.

## Topcoat Sanding

### Tolex - Color Sanding - DRY

- Step 1.** You can quickly identify & locate dust nibs by light sanding in the first pass.
- Step 2.** Remove them by sanding with Tolex discs on needed areas only. Use Tolex sheets on hard to reach areas.

\*\* Not recommended for removing large paint runs and large dust nibs. Please use Eagle Yellow-Film Discs (P/N 778-; 779-) or Touch-up discs (P/N 880-; AJ2-) for more aggressive cuts.

## Compound Polishing

### Polex or Liquid Compound

If you prefer buffing, smooth it out with Polex (P/N 04038) or Liquid Compound (P/N 04024).

OR

### Buflex

For the ultimate finish and speed, use Buflex discs (P/N 192-1501) or sheets (P/N 191-1501) as instructed to remove fine scratches from topcoat sanding and to prevent reappearing scratches.

## Final Polishing

### Polex Super Polishing System

Polex Super Polishing System (P/N 04035, 04038, 04039) is the perfect product to bring out that luxurious mirror finish in the final process.

### Standard Surface

- ◆ Fresh Paint
- ◆ Acrylic Urethane
- ◆ Urethane
- ◆ Polyurethane Clear /Base Coat System

### Special Surface

- ◆ High Solid/Hard Paint
- ◆ Fluorine Clear
- ◆ Anti-scratch clear
- ◆ Aged Paint
- ◆ Polyurethane Clear /Base Coat System

Part No.	Item	Size
191-1503	Tolex Sheets	70 x 114mm
192-1503	Tolex Discs	6" dia. (150mm)
971-0016	Tolex Pads	67 x 110mm
971-0017	Tolex Disc Pads	6" dia. (150mm)
<b>6" Tolex SUPER-TACK Discs</b>		
193-1503	Tolex <b>SUPER-TACK</b> Discs	6" dia. (150mm)
<b>6" SUPER-TACK Interface Pads</b>		
971-0042	Normal Block Sanding Pads	6" dia. (150mm)
971-7052	Extra-Soft Cushion Pads	6" dia. (150mm)

## Advantages:

- Achieve Total Dry Sanding Process
- Extremely Uniform Finish
- Reduce Sanding Time
- Minimum Clogging, Longer Lasting
